Master Speaker

Slave Speaker

1.TWS connection

Before starting, the speakers cannot be connected to any Bluetooth devices.
Power on both E9-L speakers at the same time (both LED lights will be flashing).
Choose one speaker and short press the "+" and "-" buttons at the same time.
Once connected, the other E9-L LED light will stop blinking.

2.Let TWS Speakers connect to Bluetooth device

Go to the device's Bluetooth list, find "E9-L" to connect (if you see 2 E9-L on the list, the speakers are not in TWS mode) and the LED light will stop blinking.

3.TWS disconnect

On the E9-L, short press "+" and "-" buttons to disconnect the TWS

Tips:

01.Connecting two E9-L (TWS Mode) on the first one press "+" and "-", this speaker will become the master speaker (left channel) and the other will become the slave speaker (right channel)
02.Only supports two speakers under TWS connection
03.Speakers will remember the TWS relationship (master/slave) when reconnected
04.Once TWS is connected, the slave speaker's LED will be ON and the master speaker's LED indicates the status of play, pause, Bluetooth connection, etc.
05.When TWS is connected the functions are the same on each E9-L speaker (synchronous functions)
06.When powering ON both E9-L speaker at the same time, if the LED is solid on one and other is blinking, the speakers are in TWS mode.
